

FMS Model Futura V2 80mm EDF Jet

A legend reborn- The FMS 80mm FUTURA V2

The FMS Futura is a licensed sport jet developed by FMS in conjunction with Tomahawk- Aviation. Designed by a Sino-German team of engineers, the Futura represents the pinnacle of what a foam jet can be.

While retaining V1 features such as the CNC metal trailing-link landing gear for rough field operations, robust airframe with high-strength wing spars, oversized electronics bay etc. The FMS 80mm Futura V2 is upgraded with 13g all-metal digital servos for increased precision and torque, improved plug-type connectors that are durable and reliable, and an attractive blue paint scheme.

FEATURES & SPECIFICATIONS

- Power system: Hobbywing 100A ESC, 3280-KV2100 motor, 80mm 12 bladed fan
- CNC all-metal landing gear. 10mm diameter worm drive, trailing-link suspension, highly precise and robust.
- All servos upgraded to 13g all-metal units for improved precision and torque
- Large tires- suitable for rough-field operations
- Oversized electronics bay for easy maintenance and accepts large capacity batteries
- Glue-less assembly, the aircraft is built with only 10 screws
- Environmentally friendly water-based paint
- Newly designed latch prevents unexpected canopy release in flight
- Improved plug-type connectors for added durability and reliability
- Attractive light-blue paint scheme
- Wingspan: 1060mm
- Length: 1170mm

Required to complete:

- Transmitter/Receiver
- Battery
- Charger

Powering the Futura V2 is an industry-leading Hobbywing 100A ESC paired with an uprated 3280-KV2100 motor turning an 80mm 12 bladed fan- delivering breathtaking power with absolute confidence.

Pedigree matters! Fly the ultimate sports jet- the FMS 80mm Futura V2!
