

The Torro goes electric

## FTX TORRO 1/10 TROPHY TRUCK EP RTR

fans of electric power can now enjoy the semi-scale realism and cool r/c driving experience of the Torro with this new brushed electric edition. Featuring trailing link rear suspension just like the desert trophy trucks racing in the New Mexico deserts, the Torro is one awesome package for any fan of extreme trucks.

For something a little different we have added a bit of colour to the Torro EP, with some blue moulded suspension parts and roll cage accessories, just to liven things up a little instead of bland old black!

This full featured brushed truck is a perfect entry in to 1/10th scale r/c and represents great value with a 60A speed control, Etronix radio system and Voltz 1800mAh battery pack. Not to mention the blue anodised aluminium shock absorbers front and rear, metal differential and crown gears and sealed 4wd shaft drive transmission.

Get ready to hit the rough stuff and watch the Torro EPsoak it up like a champ!
